

I love listening to K-Love. It is the best radio station I've ever listened to. K-Love provides for me the type of music that encourages me & gives me hope. They are family centered, & morally conscious, so I don't worry about the topic of conversation, or the content of words or ideas that come forth into the precious minds of impressionable children, & young adults. K-Love is a much needed option for radio listening. They generate the kind of listening environment that I want my children & my grandchildren (all 12 of them) to be able to enjoy. Songs that reach inside your soul, & motivate your heart towards goodness. They have a far reaching impact on the public, because there is no need to censor the content of the DJ's conversation or selection of music. It's safe listening. Some of the radio stations I have listened to, have words in the songs that are just plain vulgar, sexual, demeaning, & violent. Yet these stations flourish. There needs to be other choices like K-Love... It is the station I listen to, & hope you will allow their continued airing so that others can benefit from them also. thank you for taking the time to read this appeal. Lynn Dellaria, wife, worker, mother, grandmother, VOTER.
